ABOUT ME

Design is my passion. I'm methodical and perfectionist, hardworking and responsible, accustomed to working under pressure. Willing to give 100% of my capacity in every work I do.

The multiple activities I have done in the fields of architecture, industrial design, painting, sculpture and 3D modeling, have made me a multifaceted person. I always try to achieve the integration of these fields. I also frequently take on new learning challenges that help me improve my performance.
